USBCA-SL-06	USB Type-C Silver - 6 Feet	USD \$15.99	812928019237

### About Type-C USB

- The new USB Type C connector is reversible, so you cannot plug it in the wrong way.
- Speeds up to 10Gps to support video and high speed data transfer.
- There are 24 pins in the small connector which is about the size of the Micro "B" connector found on many Android phones currently.
- 4 of the pins are dedicated to charging/ground which will support faster charging than traditional Lightning/Micro USB cables supporting a full 3.0A current.
- Combined with the data/video speed of the USB Type C and the new USB 3.1 specifications, new phones will be able to connect to a TV for seamless Netflix / Gaming streaming.
- Devices with Type C: Apple's MacBook and Google's Nexus 6P phone.
- Samsung had a number of laptops and tablets with the Type-C connector at CES in Las Vegas. They are all to be launched 1st and 2nd quarter in 2016.
- The USB Type-C will become the standard connection for phones, tablets and laptops.

### About Xavier Cables

- CEO Jason Bringhurst has 21 years' experience in the Cables & Connectivity industry.
- Lifetime Warranty on cables means they work out of the box, for the life of the technology, free from any manufacturing defects.
- Free tech support.
- Xavier Cables / Professional Cable is a cable company with a few accessories, not an accessory company with a few cables. Our expertise is in cables, from high end data center Fiber Optic Patch cords to the basic USB charging cable in your car.
- Industry specs. USB Certified. HDMI Certified. MFI Apple Certified. ISO 9001 Registered manufacturing.
- Named one of the fastest growing companies in Utah consecutively for 6 years.
- Products are RoHS compliant meaning they are made with recyclable materials.

We donate a portion of the proceeds to Hydrocephalus charities. 1 out of every 500 children have Hydrocephalus. We are trying to help spread awareness and raise money for research. "Cables with a cause."
